SPARE PARTS **FOR ROCK TRENCHERS**

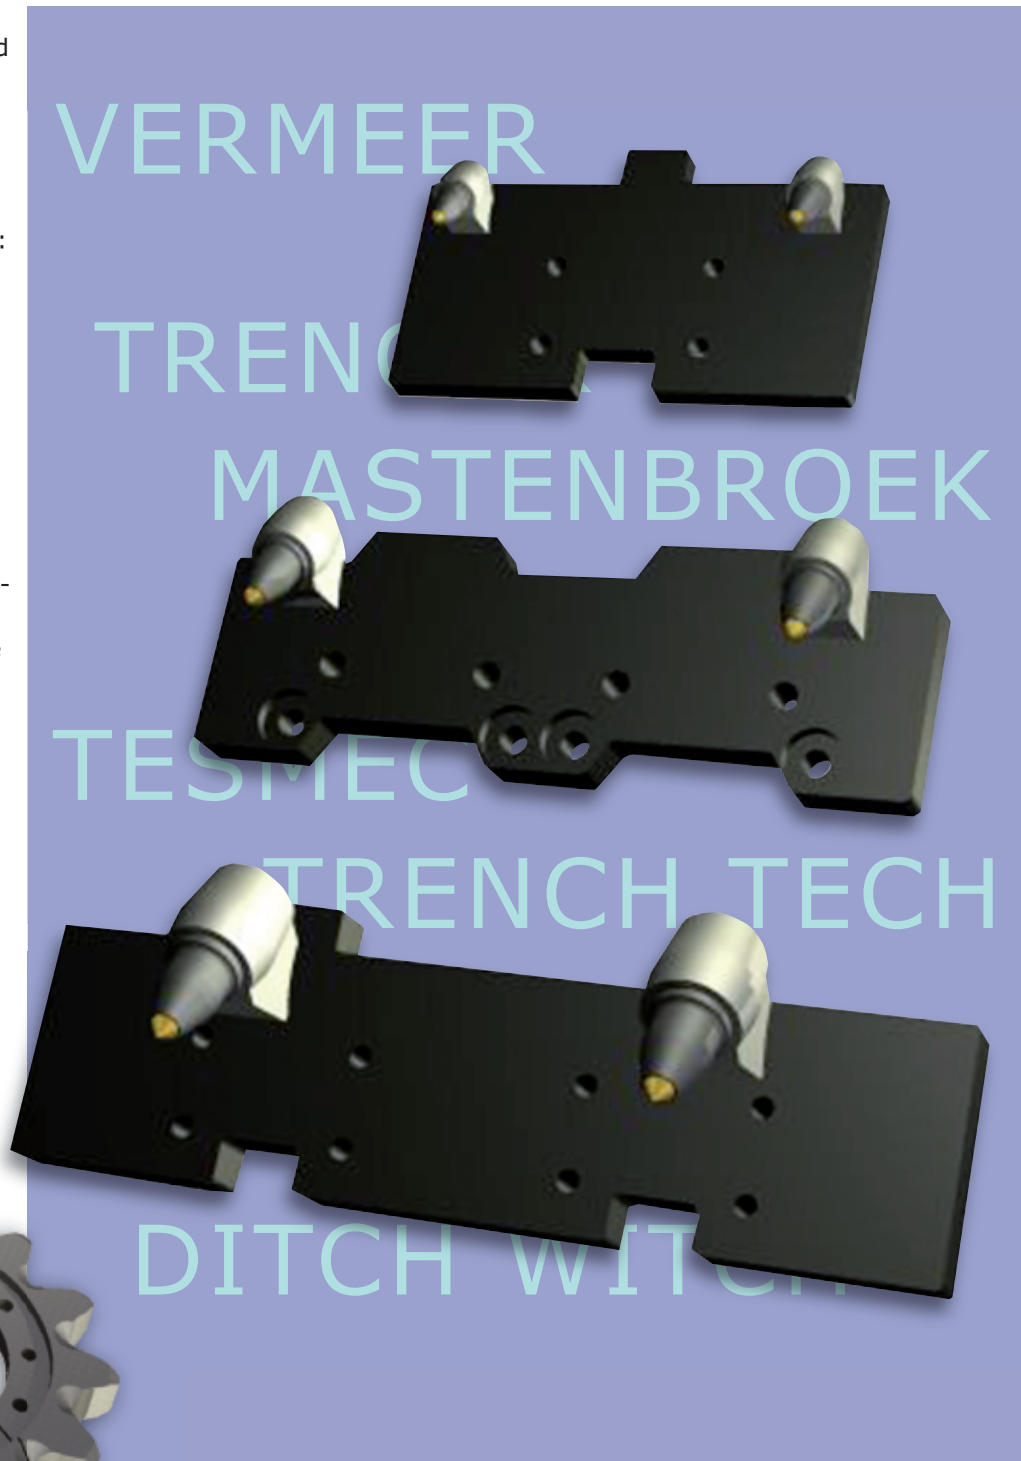

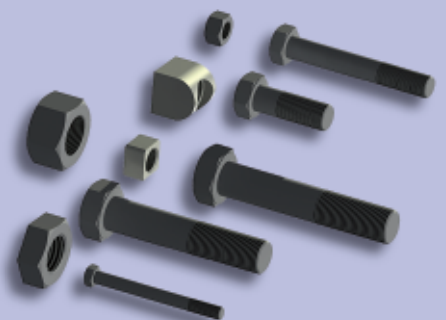

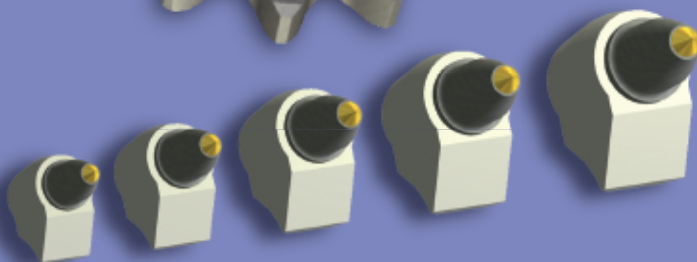

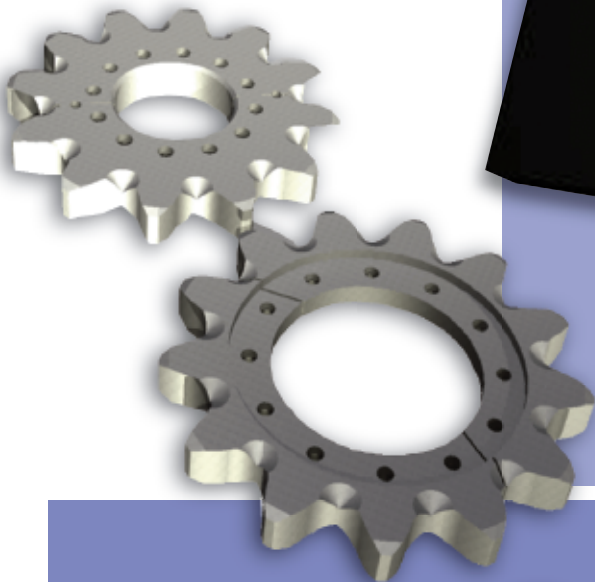

SPARE PARTS FOR ROCK TRENCHERS

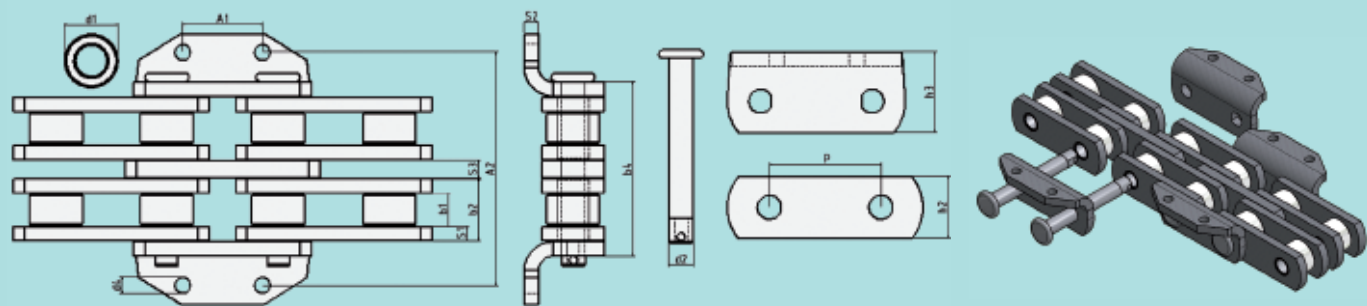

Only an extremely good quality ensures an efficient use of rock- and earthworking. Wiechmann delivers spare parts from highest quality of steel for the use of rockworking, lowering groundwater, drainage, cable laying and further earthmoving work. The production includes: Digging chains (various chain pitches, trench widths, styles), chain-wheels, blades as well as rotary cutter sets for the following machines:

**VERMEER - TESMEC - TRENCOR
TRENCH TECH - DITCH WITCH
MASTENBROEK - INTER-DRAIN
HOLLANDRAIN AND OTHERS**

The rotary cutter sets (with or without additionally applied hardface welding), are manufactured for use in rocks trench of 150-1500 mm in width. Only quality steel with special wear-resistant steels with a tensile strength of 350-500 HB is processed in different strengths. According to the rotary cutters cutter bits and blocks in diverse sizes and screw nuts of high strength quality for fixation on the chain are delivered

**WIECHMANN - 4 decades of
uncompromising development in the
metal working industry**

The task of metal to be processed so that components with optimum performance result, we are occupied with since 1963. – In the past only for normal construction machinery spare parts, today for a variety of products through-out the world market; produced with the most modern CNC-machines, laser cut and bent with efficient robot technology. Our own engineering services ensure, in cooperation with our customers, optimal development of any special task.
